Assignment 8.2 - Solution

Auto-Responsive Image Gallery (CSS Grid)

Desktop (1280px): 4 columns

Tablet (768px): 3 columns

Mobile (390px): 1 column

How the requirements are met

1. At least 8 images

10 images in the **images/** folder (landscape illustrations, in a mix of portrait, square and wide sizes).

2. Image inside a gallery item

Each **<img>** sits inside a **<figure class="gallery-item">**.

3. repeat(auto-fit, minmax())

grid-template-columns: repeat(auto-fit, minmax(220px, 1fr)) makes as many columns as fit, each at least 220px wide, sharing leftover space equally. No media queries are needed.

4. width: 100% and object-fit

width: 100%; height: 100%; object-fit: cover; fills each tile and crops instead of stretching, so mixed image shapes look uniform. Each tile is also fixed to **aspect-ratio: 4 / 3**.

5. Consistent spacing

gap: var(--gap) (1rem) between all tiles, horizontally and vertically.

6. Columns adjust automatically

Measured in the browser at each width (table below). Drag the window edge to see it change live.

Viewport width	Columns	Horizontal scroll
1280px	4	None
768px	3	None
390px	1	None
320px	1	None

index.html

```
<!DOCTYPE html>
